

BETONMAST

YOUR MOST VALUABLE TOOL

Your head is the data center of your body.
It is a tool you can't afford to injure.

Nevertheless, we expose the head to danger every time we fail to protect it. In fact, in 9 of 10 cases a chin strap on the helmet would reduce the consequence of severe head injuries. We are therefore making it mandatory to wear chin strap on all projects, in order for you to be able to enjoy all of life's moments.

Contact your supervisor for assistance in the proper use of protective equipment.
